Next.js

O que Next.js não é:

Nest.js
Nuxt.js

ibrahimcesar.cloud | [@ibrahimcesar](https://twitter.com/ibrahimcesar)

O que Next.js é um framework React para produção

ibrahimcesar.cloud | @ibrahimcesar

Toda semana um novo framework JavaScript?

The Web SDK

Next.js has all the tools you need to make the Web. Faster.

Image Optimization

<Image> and Automatic Image Optimization with instant builds.

Internationalization

Built-in Domain & Subdomain Routing and Automatic Language detection.

Next.js Analytics

A true lighthouse score based on real visitor data & page-by-page insights

Zero Config

Automatic compilation and bundling. Optimized for production from the start.

Hybrid: SSG and SSR

Pre-render pages at build time (SSG) or request time (SSR) in a single project.

Incremental Static Regeneration

Add and update statically pre-rendered pages incrementally after build time.

TypeScript Support

Automatic TypeScript configuration and compilation.

Fast Refresh

Fast, reliable live-editing experience, as proven at Facebook scale.

File-system Routing

Every component in the `pages` directory becomes a route.

API Routes

Optionally create API endpoints to provide backend functionality.

Built-in CSS Support

Create component-level styles with CSS modules. Built-in Sass support.

Code-splitting and Bundling

Optimized bundle splitting algorithm created by the Google Chrome team.

```
# javascript  
npx create-next-app@latest  
yarn create next-app  
  
# typescript  
npx create-next-app@latest --typescript  
yarn create next-app --typescript
```

```
// https://nextjs.org/examples
```

```
import { GetStaticProps, GetStaticPaths, GetServerSideProps } from 'next'

export const getStaticProps: GetStaticProps = async context => {
  // Geração estática com dados em build time
}

export const getStaticPaths: GetStaticPaths = async () => {
  // Lista caminhos para popular dados em build time
}

export const getServerSideProps: GetServerSideProps = async context => {
  // Requisita dados em Server-Side, a cada request, em run time
}
```

```
.  
src/  
  pages/  
    index.tsx  
    posts/index.tsx  
      [id].tsx  
      [...url].tsx  
  api/  
    hello.ts
```

SSG

Static Site Generation

ibrahimcesar.cloud | [@ibrahimcesar](https://twitter.com/ibrahimcesar)

Static Generation

The HTML is generated at **build-time** and is reused for each request.

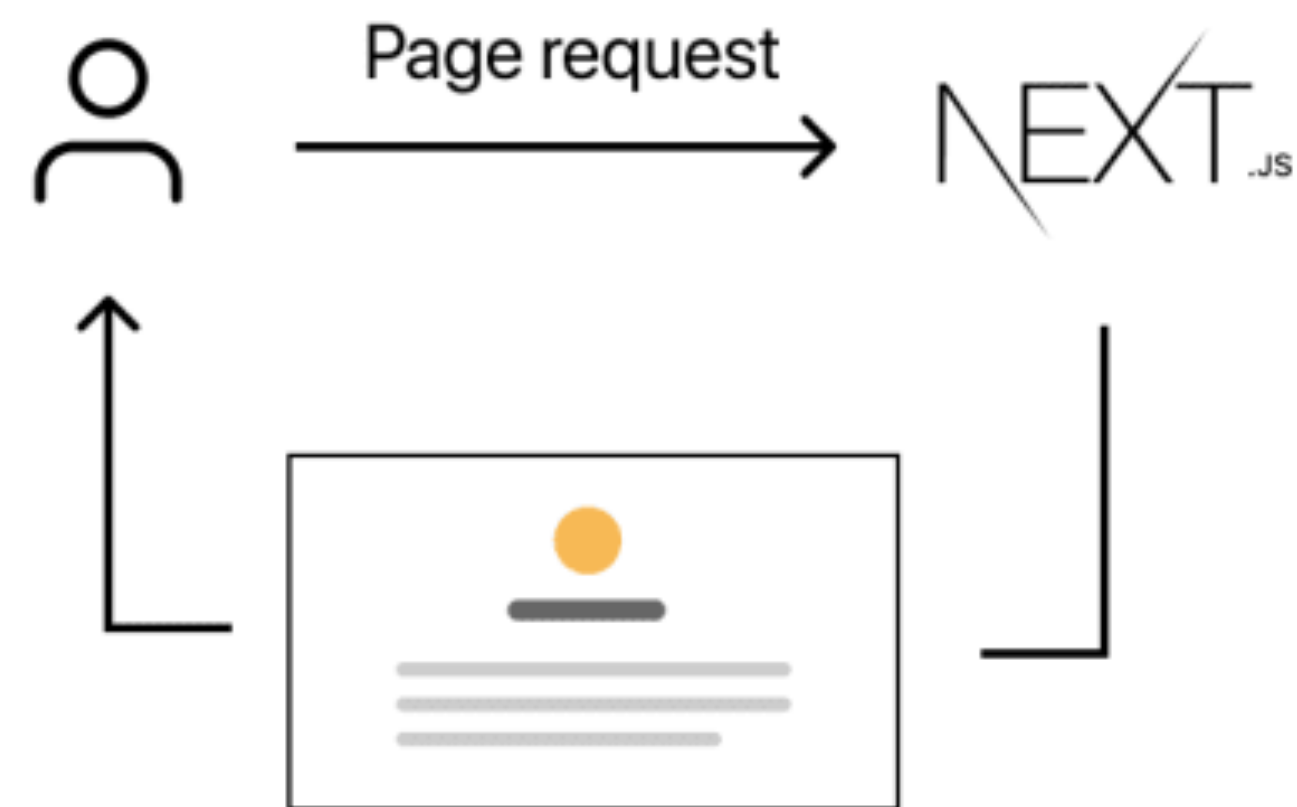

SSR

Static Site Rendering

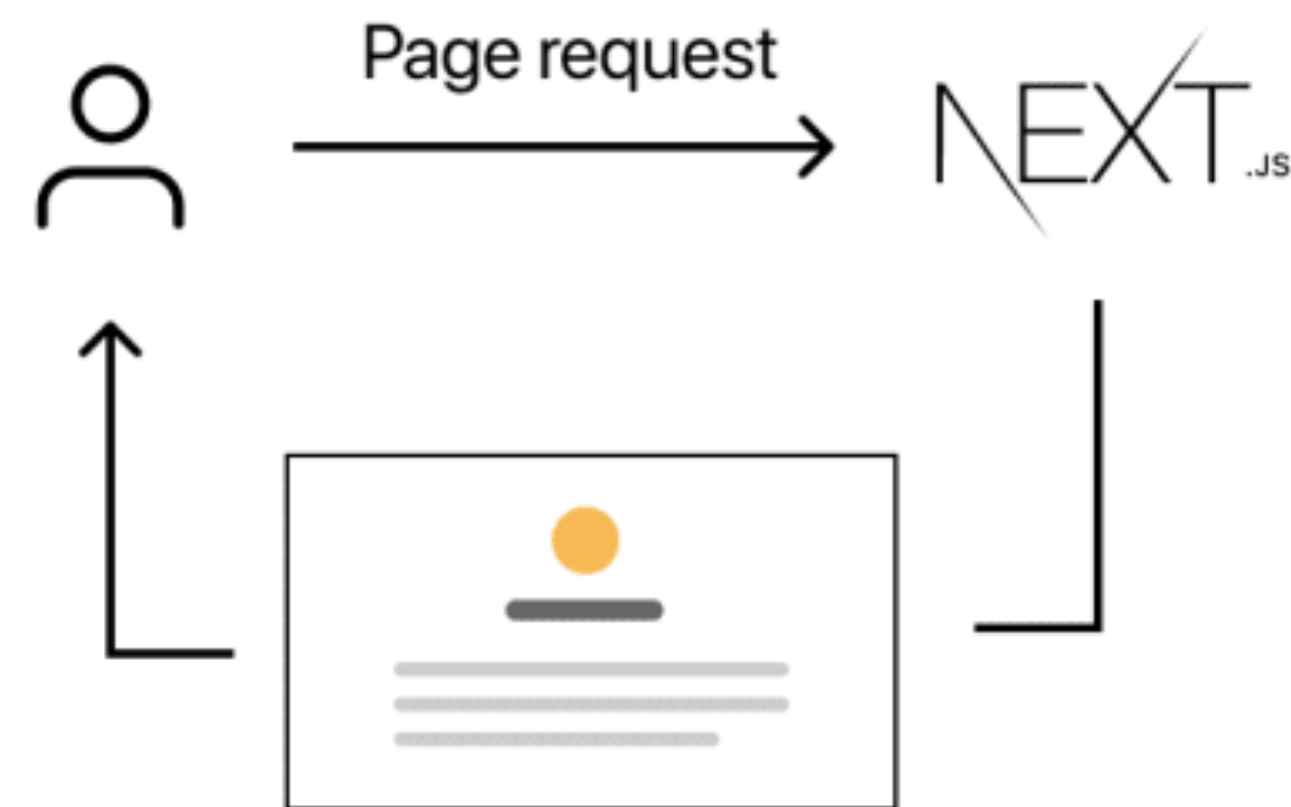

ibrahimcesar.cloud | [@ibrahimcesar](https://twitter.com/ibrahimcesar)

Server-side Rendering

The HTML is generated on **each request**.

The HTML is generated

The HTML is generated

ISR

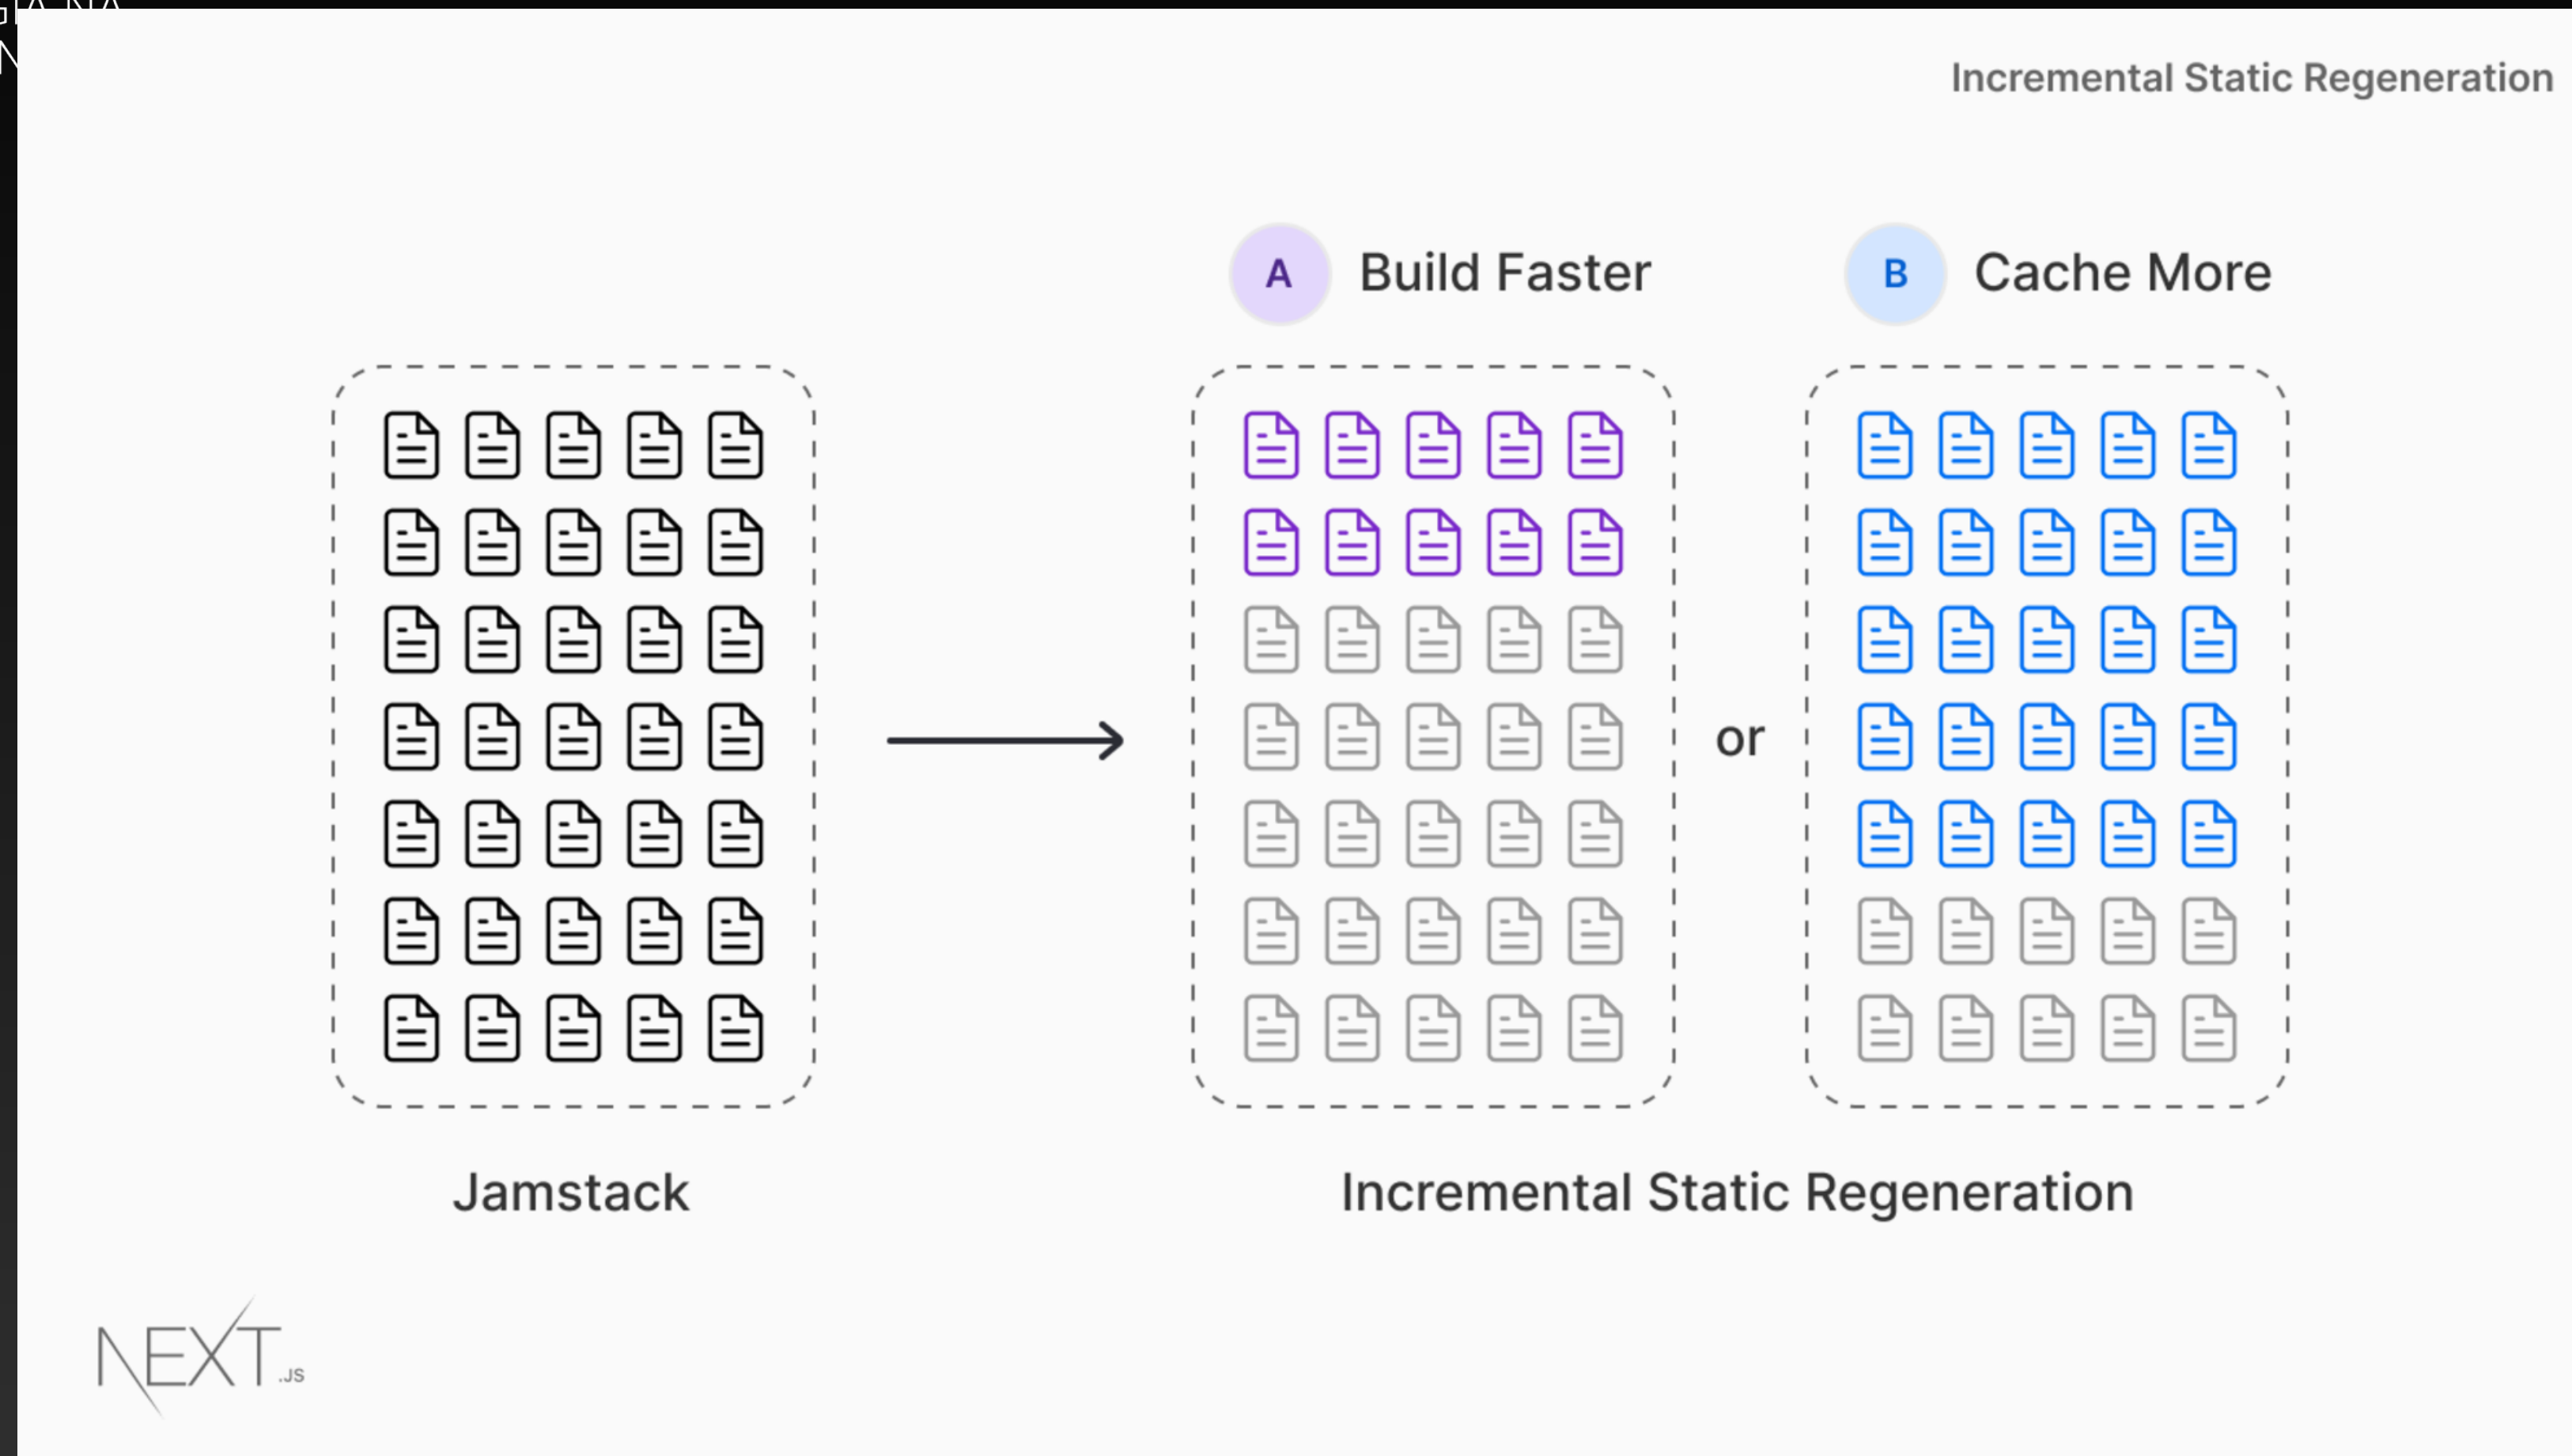

Incremental Static Regeneration

Addy Osmani ✓

@addyosmani

Is performance on the web getting better? The answer is yes :) 33% of origins now meet the Core Web Vitals thresholds! Lots of improvements from sites using a framework too.

Cloud Development Kit

AWS CDK serverless deploy for Next.js with SSR and ISR

Next.js webapp using Server Side Rendering (SSR) and Incremental Static Regeneration (ISR) deployed with Serverless Nextjs CDK construct on AWS using CloudFront and Lambda@Edge

[Live Demo](#)

PokéServerless is *just* a Proof of Concept!

Minimal NextJS with Server Side Rendering (SSR) and Incremental Static Generation (ISR) – **Gotta Fetch'Em All!** – and deployed with [Serverless Nextjs CDK construct](#) on AWS using CloudFront and Lambda@Edge.
